

Opening a 3D PDF created in Autodesk Inventor:

1. Save PDF to your computer (do not open within Email)
2. Double-click PDF to open.
3. PDF may open with a blank page and a yellow strip across the top with a message in the top left, “3D content has been disabled, Enable this feature if you trust this document.”

4. Select “Options” on the right side of the yellow strip

5. The fly-out will provide two choices. Select “Trust this document always” to always enable 3D content. The page may still appear blank. Click your mouse in the center of the page to activate 3D content.
6. If the drawing will not display, select “Trust this document one time only” and click in the center of the page.
